Note :- ENSURE SCORPION SYSTEM IS CLEAR OF MOVING PARTS AND ALL ORIGINAL FUNCTIONS WORK CORRECTLY

Kawasaki ZX10R 2008

Servo Wheel Fitting Instructions

To disconnect cables at the seat end, you have to remove the hexagonal wheel, without turning it's shaft.

Remove bolt in centre of hexagonal wheel. Support wheel if tight.

Remove hexagonal wheel from shaft, retaining OE bolt.
DO NOT TURN SHAFT

Remove spring clip retaining cables and completely remove the cables

The replacement wheel comes with an aluminium collar that is secured in place with OE bolt and split washer.

TIGHTEN TO 5ft/lb USING A TORQUE WRENCH

The replacement wheel must be fitted with the etched letters "UP"

The replacement wheel will only fit one way with the letters "UP". In case of difficulty please contact us.

With servo wheel fitted, the loose cables will be removed with rest of exhaust system.
