<b>Bike</b>	Royal Enfield Meteor 350	<b>Part No.</b>	PRE-102
<b>Year</b>	2020 - Current	<b>Fit Kit</b>	Z039.10718
<b>Notes</b>	Where not supplied use original fittings. Remove OE Gasket	<b>dB Killer</b>	SCEXDBK48 - (TYPE PC)

A) Start by loosening the clamp between the rear silencer and the connecting pipe.

B) Loosen and remove the nut on the back of the rear silencer mounting.

C) Support the weight of the silencer with one hand, then remove the mounting bolt.

D) Carefully remove the silencer, clamp and gasket from the bike and store in a safe place.

E) Place the supplied clamp onto the end of the Scorpion silencer.

F) Slide the Scorpion silencer on to the original connecting pipe and align the mounting bracket with the original mounting point on the frame.

G) Use the original mounting bolt and nut to secure the Scorpion silencer to the frame. Do this finger tight to begin with, adjust the silencer to the correct position and then fully tighten.

H) Now tighten the clamp between the silencer and the connecting pipe.

Take the bike for a short ride to ensure it functions as it should. Once the bike and exhaust are cool enough check all nuts, bolts and clamps are still secure.
